

Dear Parent/Guardian,

Our school is using Lexia Strategies™, a reading computer program that provides practice and instruction in foundational reading skills for students in grades 6 and above.

If you don't already have Lexia Strategies at home, getting started is easy!

1. For computers, launch a web browser and go to [www.lexiastrategies.com](http://www.lexiastrategies.com):
  - If you have a slow Internet connection or if do not have a web browser that can run Strategies, you can install the Strategies software on your computer instead of using the website. Go to [www.lexialearning.com](http://www.lexialearning.com) and click Downloads at the top of the page. You will need a 16-digit SiteID (see below) to install Strategies.
2. For iPad/iPad mini, download the Lexia Strategies app:
  - In the App Store, search for "Lexia Strategies."
  - Download the Lexia Strategies app.
3. For Android tablets, download the Lexia Strategies app:
  - In the Google Play Store, search for "Lexia Strategies."
  - Download the Lexia Strategies app.
  - Note that the app is not available for Kindle.
4. For all versions, the first time you open Lexia Strategies, you must set up:
  - Click the Home button and provide your teacher's email address (below).

<p><b>Teacher Email (for web or app setup):</b> _____</p> <p><b>SiteID/Customer Code (for software setup):</b> _____ - _____ - _____ - _____</p> <p><b>Student Username</b> _____</p> <p><b>Student Password</b> _____</p>
--

5. After you have set up Lexia Strategies, allow your child to login:
  - The username and password (above) is the same login they use at school.
  - Important! Allow your child to work independently. Provide encouragement, but don't give away the answers!
  - Please try to ensure an average of 20-30 minutes per session and keep usage at a reasonable level - not too short and not too long.

Need more help getting started? Go to [www.lexialearning.com](http://www.lexialearning.com) and click **Support**.

Sincerely,

Mr Mulholland SENCO
